Good, I agree. My purpose was two-fold: (1) We would better educate him with the ammo to be able to defend us if others are critical of the project behind closed doors, maybe provide him with some "talking points" and (2) Ask him to give us some insight as to what he has heard privately among the other PC members on our CPAM, so we can focus and refine our efforts. This helps us better identify problem issues and/or problem people. Based on the fact that you just helped him out on the Alabama deal, he owes us this information.... I dont think he'll balk. Do you?

We already know we need to get our ducks in a row on the following:  
-- better defining (in writing) Phase 2 of the project in terms of size/capacity/etc  
-- providing a concept map/pictoral of the same  
-- better identifying the consequential traffic impacts by writing a Traffic Impact Analysis  
-- providing our survey information/results to the Committee when available

I will call Beerman and try to schedule for the week of August 9th. Respond to the office, I cc'd myself and Doug above. KK
