<b>POLICY</b> Data Dashboard	<b>CMS/NEPN Code:</b> AEC
---------------------------------	------------------------------

DC P. 31

In order to help CMS attain and maintain excellence in all key areas, the Charlotte-Mecklenburg Board of Education establishes a “data dashboard” that is aligned with the Board’s management oversight responsibilities and the School Accountability Policy. The data dashboard will consist of a limited number of indicators selected by the Board of Education (analogous to the dials on a car dashboard) for which data are gathered and analyzed by CMS staff, under the direction of the Superintendent, and presented on a regular basis to the Board of Education and the public.

Although the Board of Education tracks CMS’ performance in many ways throughout the year, the data dashboard will enable the Board of Education and the public to monitor key indicators of system performance, including but not limited to student achievement, finance, operations, and parent, student, and teacher satisfaction. The indicators will enable the Board of Education and public to see, at a glance, whether current improvement efforts are on track and to respond appropriately when problems arise. The indicators will enable CMS to effectively and clearly communicate its priorities and progress to the public.

The data dashboard will do the following:

- Provide a concise, but comprehensive summary of district performance, including baseline data, targets and results,
- Present data clearly and in an easily understood manner,
- Communicate the Board of Education’s priorities to the community, and
- Contain regularly updated information based on regular management reports and management oversight workshops.

The data dashboard will be reviewed and updated at least annually.

The Superintendent will ensure that the current version of the data dashboard accompanies this policy as an exhibit. The Superintendent will also ensure that
