

- Concern that issue of scientific uncertainty hasn't come out enough - how to address
- clear on sources: how do we present sources? who is the authority?
- order: concern that we're presenting a conclusion (Arctic swam) before the science behind it - comes across as an advocacy piece
- concerned w/ use of native voice to reach a scientific conclusion
 → we very deliberately didn't place any ^{diff} values on either
- reads as an advocacy piece
- idea of rate should be brought out
- include more of the science behind the story

order wrong - redesign
 range + rate + uncertainties - treatment
 + language + script

Friday:

- Scientist to scientist
- express doubts/concerns
- put them on notice about possible delay

pull out concept
 pull out draft
~~pull~~
