

TRSA / UTSA

6/4

Judy Smith, TRSA (little says)

David Dunlap, UTSA (big says) 75%

Bill Gerry, CCS

Adam Cramer, CCS

LB, Bob Dellinger

June 26th ^{TRSA} UTSA Board of Directors meeting
↳ Joint Task Force Meeting

Exclusion - arguments - used towels valuable to users + laundries

↳ ∴ commodity like

- partial reclamation *

- containerized

* in material CCS submitted, showed that they meet
partial reclamation

"product stewardship / extended product responsibility" - esque :
generators have most influence in keeping toxics out / recovery of solvent

→ remind that state policies are not affected by the
proposal → until final nothing takes effect

Bf: what if there is a lapse in the condition?

PD: just need to correct conditions

Bf: does the rule ~~also~~ talk about ~~the~~ what problems it
addresses?

Bf: in CSL, printers wanted something simple - it wasn't a
big env. problem to be addressed

BD: we are going to concentrate on resource conservation

perf. standard for transportation

market issue

3rd ~~concept~~ - solⁿ

"ree liquids" ① - definition? de minimis levels?
↳ thimbleful? cup? → in bottom of barrel:

② → on the towel?

↳ should be based on ambient temp & pressure → not doing anything out of the ordinary

↳ some states use a test: paint filter or drip test

been a problem for years: scientific / technical or common sense?

Run through conditions:

"minimize loss" (JS) → going to go any further with that right now?

where does handling process start?

GET THEM LANGUAGE

signature to states not misinterpreting rule as saying that these materials have always been haz. waste.

"What is going on with disposables / who are the stakeholders?"
